Research

Setting Up of New Institutes

Institute of Theoretical Physics

The Department of Physics has established an Institute of Theoretical Physics with Professor C N Yang as its inception Director.

The purpose of the Institute is to provide a platform to facilitate interaction between young scientists and distinguished world leaders in the field, with a view to producing frontier research results and becoming a leading centre of theoretical physics in South China.

Institute of Precision Engineering

The Department of Automation and Computer-aided Engineering of the Faculty of Engineering, and our Physics Department have jointly established the Institute of Precision Engineering. Build on a bid of HK\$60m from the ITC R&D fund, the two Faculties see precision engineering as the major driving force to propel the watch industry in Hong Kong to a new sphere of breakthrough technologies and applications of precision engineering in other areas, such as nanotechnology, optical manufacturing, and jewellery industry.
