植物也呼吸： 對天氣與空氣污染有何影響？

Plants Breathe: How does it affect Weather and Air Pollution?

植物的呼吸對我們的環境尤其重要。講座會介紹植物呼吸的機制，探討它們對天氣、氣候和空氣質素的影響，以及我們應如何有效的管理城鄉林木，以達致可持續發展。

The breathing of plants exerts a tremendous influence on our living environment. This lecture explores the mechanisms of these processes and how they shape weather, climate and air quality of our living environment, and how we can better manage urban and rural trees for sustainable development.

戴沛權 教授
地球系統科學課程

Professor TAI Pui Kuen Amos
Earth System Science Programme

20 • 3 • 2020
星期五 Friday
4:00 - 4:30 p.m.

廣東話主講
Conducted in Cantonese
