宇宙的起源 The Origin of the Universe

很多人知道宇宙在大爆炸開始——畢竟科學家和電視劇都是這樣說的。但很少人真正明白大爆炸理論，更遑論這理論與我們的關係。這個講座會討論宇宙起源的科學理論和我們如何獲得現有的知識。讓我們作一次時光之旅，一起回到宇宙的起點。

A lot of people know that the universe started with a bang. At least the scientists and the TV sitcom say so. Not many people however really understand what the Big Bang Theory means, let alone its relationship with us. In this talk, we will discuss the scientific knowledge about the origin of the universe, and how it developed into the current understanding. Let's take a tour back to the beginning of the universe.

梁寶建 博士
物理系

Dr. LEUNG Po Kin
Department of Physics

27 • 3 • 2020
星期五 Friday
4:00 - 4:45 p.m.

廣東話主講
Conducted in Cantonese
