BEHM and EESC**

2:15

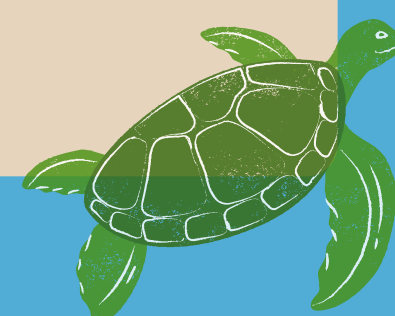

PM

**CUHK Science
Live Chat
&
Consultation**

Topic: Our Future Oceans

Speaker: Professor FALKENBERG Laura Jane

Marine ecosystems provide services central to our lives – from food through to recreation, shoreline protection, and medicines. But, these are all threatened by global climate change. Find out what existing evidence suggests ocean ecosystems could look like in the future, and get insight on the most important questions researchers are currently addressing.
