Science Career Fair Preparatory Kit

Before the Career Fair

1. Research about the fair. What are the participating employers?
2. Prepare 3-5 high quality questions you want to ask each employer you are interested in.
3. Polish your one-page CV, and write cover letters if necessary.
4. Activate your LinkedIn profile, follow your target employers' pages and have them shown in the activity log.

During the Career Fair

1. Participate in the activities at the fair, such as visit the exhibition in SC G25 and join the recruitment talks in SC G26 to equip yourself.
2. Be open-minded to meet more employers and expand your network.
3. Ask quality questions, communicate professionally and naturally, and leave the best first impression. Make it a conversation but NOT an assessment.

After the Career Fair

1. Connect the people you know on LinkedIn or other professional social media platform. Follow up sometimes to keep the relationship warm.
2. Apply for the graduate jobs/internships you are interested in.
3. Connect with the Faculty Office for job opportunities and programme updates.
4. Follow Faculty's IG, LinkedIn and like Faculty's Facebook page.

Altruist Financial Group Limited

<https://altruist.com.hk/>

Industry: **Finance**

Established in 2001, Altruist is a leading financial planning organization in Hong Kong. Partnering with over 60 renowned business partners, we now carry a wide array of financial products and services, ranging from insurance, investment funds, employee benefits, MPF, personal banking services to health solution. Our mission is to address the unique financial needs of each individual. In addition to our base in Hong Kong, Altruist has obtained the first joint-venture insurance agency license in Shenzhen as well. Altruist is also one of the few in the industry which is licensed with SFC to carry out Type 1, 4 and 9 regulated activities.

Position Available:

Account Manager - Customer Service & Development

Astra Optics Limited

<https://astra-optics.com/>

Industry: **Technology**

Astra Optics Limited, founded by a team of experts in optical engineering, material science, and nanomanufacturing, is a spin-off company from the Chinese University of Hong Kong. Our ground-breaking 3D nanofabrication technology, i.e., femtosecond projection laser patterning system and hydrogel-based multi-material fabrication platform, has proven records to revolutionize the micro-additive manufacturing industry by overcoming critical bottlenecks in current state-of-the-art solutions.

Positions Available:

光学（助理）工程师

材料（助理）工程师

软件开发工程师

Atease Healthcare Limited

<https://www.lovepluscare.com/>

Industry: **Healthcare**

Atease Healthcare Limited is a rapidly growing healthcare products company specializing in high-quality health supplements. Our mission is to improve the well-being of our customers through scientifically-backed products. We cater to healthcare professionals, online channels, institutions and individuals.

Positions Available:

Business Development Executive - Health Supplements
Management Trainee - GMP Pharmaceutical Manufacturing

China Spallation Neutron Source

<http://english.ihep.cas.cn/csns/>

Industry: **Science & Engineering**

China Spallation Neutron Source (CSNS) is one of China's leading national research facilities for materials science. It produces neutrons with an accelerator-based system that delivers proton pulses to a tungsten target through a process called spallation. These neutrons are then directed toward state-of-the-art instruments that provide a variety of capabilities to researchers across a broad range of disciplines, such as physics, chemistry, biology, and materials science.

The upgrade project (CSNS-II) aims to increase the beam power to 500 kW and construct 11 neutron instruments and two experimental terminals (the muon experimental terminal and the high-energy proton experimental terminal). The new research position will collaborate with researchers at the CSNS, joining the Accelerator Department to engage in physics and technology research related to high-power proton accelerators, and the Neutron Science Department to participate in spectrometer construction and cutting-edge scientific research.

Positions Available*:

Many positions available for degree holders at master's level or above

**English details for available positions forthcoming*

Codex Genetics Limited

<https://www.codexgenetics.com/>

Industry: **Biotechnology**

Codex Genetics Limited is a Hong Kong-based biotechnology company specializing in precision medicine through advanced genetic testing, bioinformatics, and AI-driven analytics. The company provides clinically actionable solutions for disease diagnosis, treatment, and management, focusing on oncology, hereditary disorders, neurodegenerative diseases, and rare conditions. Its offerings include genomic profiling, customized genetic panels, and data-driven healthcare insights for medical professionals, hospitals, and pharmaceutical partners across Asia. Leveraging next-generation sequencing and proprietary bioinformatics platforms, Codex Genetics aims to accelerate diagnostics, personalize therapies, and improve patient outcomes in the region.

Positions Available:

Data Scientist

Medical Sales

Research Assistant

Office of Co-operative Education Programme

<https://coop.cuhk.edu.hk/>

Our Mission for Future Talent

1st university-wide co-operative education programme in HK

WHAT: Combine classroom-based education with practical work experience

HOW: 2 preparatory courses & a 6-to-8-month placement

WHO: Degree-seeking students of Year 2 or above

WHY: 1) Hone students' core competencies
2) Fast-track students' workplace readiness

Positions Available:

Full-time 6-8 month placement positions from 130+ corporates both local and non-local (in the GBA/mainland China and Asia)

JQ Investment (HK) Limited

JQ Investments

<https://www.jqinvestments.com/>

Industry: **Finance**

JQ Investments is a leading quantitative hedge fund specializing in equities, futures, options, and other derivatives. We have delivered over a decade of exceptional returns and strive to continuously advance the frontiers of quantitative research and technology.

At JQ Investments, we combine the fast-paced energy of a trading floor with the intellectual rigor of a research lab. Our team includes experts in statistics, mathematics, and computer science, drawn from top universities, research institutions, technology companies, and financial firms. Collaboration drives us. Passion and innovation motivate everything we do.

Positions Available (*both summer internship & full-time*):

Quantitative Researcher

Deep Learning Researcher

Execution Trader

Algorithmic Developer

Core Developer

High Performance Computing Engineer

FPGA Engineer

LAB - A - PORTER

<https://lab-a-porter.com/>

Industry: **Lab Supplies**

LAB-A-PORTER is pioneering the modernization of product distribution within scientific research, healthcare, and education sectors. Our platform provides researchers with streamlined access to a comprehensive selection of products from globally recognized manufacturers, all at their fingertips.

We are committed to supporting researchers in achieving their preclinical research objectives. We specialize in the global sourcing and distribution of quality reagents and tools necessary for disease modeling, drug discovery, cell and gene therapy research, and tissue engineering. Our services cover a wide range of research needs, including drug target identification, biomarker and pathway analysis, and the development and testing of in vitro and animal models.

Position Available:

Technical Sales Specialist

NutrigeneAI Biotech Limited

NutrigeneAI

Vascular is Everything

<https://nutrigeneai.com/>

Industry: **Biotechnology**

NutrigeneAI Biotech Limited ("NBL") is a private biotechnology company pioneering cytokine-based regenerative medicine to revolutionize treatment and management of peripheral arterial diseases (PAD). We are dedicated to advancing current therapy through groundbreaking type2 cytokine-based drug developing and cell-based regenerative medicine. To overcome the prohibitive cost, time, and inefficiency of traditional antibody/protein therapeutic discovery, we integrate cutting-edge Artificial Intelligence (AI) throughout our pipeline, with AI-driven directed protein evolution as a core engine for optimization. As we continue to evolve, our ultimate goal is to create our own platform for drug screening based on our target and mechanism of action (MoA), focusing on the endothelial healthy, and trying to enhance the quality of life for individuals affected by ischemic vascular diseases.

Position Available:

Research Scientist

QIMA Testing (HK) Limited

<https://www.qima.com>

Industry: **Testing and Certification**

QIMA Testing HK is a consumer products testing laboratory specializing in children's products, branded merchandise, hardlines and textiles, with operating laboratories in the US and Hong Kong. We have decades of experience in the consumer products industry: we know testing, and the regulations and standards that drive it.

We're part of QIMA Group, a global provider of quality control and compliance services that helps brands and retailers manage their supply chains. Our Operations team is a place where you can grow your technical and management skills - while helping us bring trust to global trade.

Positions Available:

Assistant Chemist
Assistant Engineer
Client Services Representative
Summer Internship (Jan - Aug)

Recruitment Talks

Date: 25 Sep 2025 (Thu)

Venue: SC G26
Room G26, G/F,
Charles Kuen Kao Building,
Science Centre

12:30 - 13:15 Codex Genetics Limited

13:30 - 14:15 Astra Optics Limited

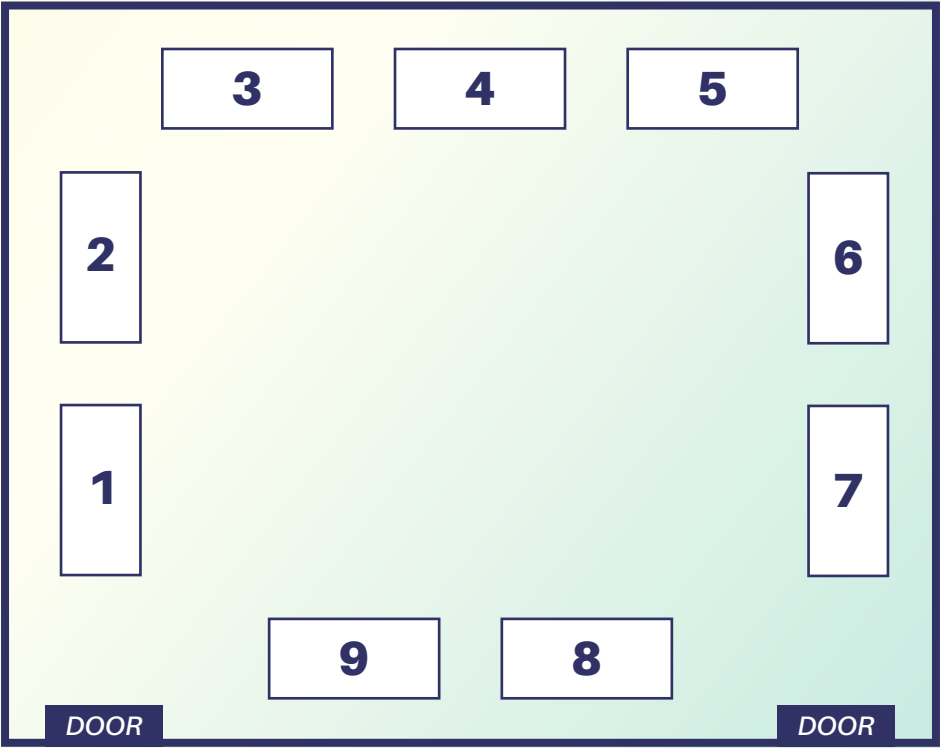

15:30 - 16:15 China Spallation Neutron Source

Seats are limited, and priority will be given to registered students on a first-come, first-served basis.
